

StemOne Biologicals Pvt . Ltd.

Newsletter-2011

Dear Members ,

Wishing all our members a Very Happy Diwali and Prosperous New Year.

As has been our tradition, we take this festive season as an opportunity to update you on all the latest news from StemOne. It has been an interesting year, one which has seen StemOne move up a few notches in the field of stem cells. Our company has grown to a 40+ employee organization spanning india and Sri Lanka.

NEW FACILITY

This year has seen us develop India's largest and ONLY Class 10,000 GMP facility, exclusively for stem cells. To give it a perspective, this level of quality exists only within the pharmaceutical industry. At 15,000 sq.ft. it is the biggest independent facility of its kind in India. It highlights our commitment to offer the best there is, in the field of stem cells, to our customers. Spread out over 60,000 sq.ft. in Pirungut, it is the ideal location for a long term, single facility, service commitment to our members and customers.

NEW ALLIANCES

We are constantly striving to target cutting edge technology in the field of stem cells. This ongoing commitment to R & D is with a focus on generating cells that can be used to treat common everyday ailments, those that severely affect our quality of life.

Towards this goal, StemOne has an active working MoU with Taiwan's largest listed stem cell company, Bionet. The joint venture is to develop technologies for

cryopreservation of Wharton's Jelly derived Mesenchymal Stem cells (WJMSC) and those for beauty treatments.

StemOne is also in association with the Sahlgrenska University Hospital & Transplantation Centre, Gothenburg, Sweden to develop technologies for treatment of liver disease using stem cells.

StemOne is also associated with the world's largest Medical Tourism Company, Placidway, USA.

CURRENT R & D

We have developed a robust R & D. We welcomed Dr. Meghnad Joshi, in December 2010. He has worked in Karolinska institute and Sahlgrenska University Hospital & Transplantation Centre for 4 years. He is an expert in the field of stem cells and cell differentiation and has been spearheading our R & D program.

Our current R & D focuses on :

Current Services

Along with cord blood banking, StemOne now offers Banking for:

Peripheral Blood Stem Cells

Wharton's Jelly MSC

We also offer stem cell therapy services for:

Neuro Degenerative Diseases

Arthritis (MSC + activated PRP)

Diabetes Type II (MSC)

Hair Loss (PRP)

Sports injury (activated PRP)

StemOne has successfully completed more than 600 infusions

StemOne has also initiated a "Member Discount Card" for all members opting to store their Wharton's Jelly MSC. Since these cells can be utilized extensively within the family for common ailments, this benefit card would help in the immediate use of stem cells within the family.
